DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 26-58, drawn to an electrophoretic display device, classified in class 345, subclass 107.
- II. Claims 59-60, drawn to a method of manufacturing a display device, classified in class 204, subclass 521.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case Claims 26-58 are drawn to the product and the operating principles and Claims 59-60 are drawn to the method of manufacturing said product.
